objective

To obtain a full time position in the software engineering field at a dynamic high tech company.

industry experience

2019-Present **Civitas Learning**

Austin, Texas

Platform Lead, Senior Staff Software Engineer

Currently I am the tech lead for the Civitas data pipeline platform team. I am leading a team that is responsible for architecting and building out a next-generation streaming data pipeline in the higher education space to enable our consuming applications to be more real-time, scale efficiently, onboard new customers quicker, and reduce cloud computing costs. In addition to understanding the technical challenges we face, I also strive to balance out our priorities based on the business value the team can deliver. Technologies used include the Confluent platform, Apache NiFi, Apache Atlas, and Spring boot among many others.

2017-2019 **Civitas Learning**

Austin, Texas

Platform Lead, Staff Software Engineer

2014-2017 **HomeAway**

Austin, Texas

Senior Software Engineer

At HomeAway, I was a senior software engineer and team lead for the internal tools and infrastructure team. I was previously on the core platform team which covers HomeAway's high-traffic REST API and enterprise messaging busses. I worked with technologies such as RabbitMQ, Elasticsearch, Hadoop, Kafka, Rails, and Docker among many others.

- Architected, developed, and rolled out a new internal application based on Ruby on Rails used by all engineers to accurately capture capitalizable time
- Architected and developed a distributed microservice-based JSON registry used by a variety of applications across the organization
- Led the migration to and architected new solutions on AWS for the productivity engineering organization
- Mentored the 3 Day Startup Program sponsored by HomeAway both in Austin, TX and London, UK
- Architected, developed, and open-sourced the HomeAway Ruby SDK for the HomeAway Developer API and Ruby library for communicating with Apache Storm clusters on behalf of HomeAway

2012–2014	IBM <i>Staff Software Engineer</i> Engineer on the Cluster Aware AIX team, the backbone of the clustering capabilities of the IBM enterprise grade UNIX operating system. I led the effort to maintain, refactor, and enhance the AIX cluster communications daemon.	Austin, Texas
	<ul style="list-style-type: none"> • Led the AIX effort to certify Oracle Real Application Clusters database on PowerHA • Enhanced AIX clustering to scale to 32 nodes and 1024 disks per node, including parallelization of core clustering libraries • Enabled unicast AIX cluster heartbeating • Enabled dynamic network configuration change support across clustered systems • Co-author of a clustering algorithm patent 	
2010–2011	IBM <i>Power Systems Firmware Engineer Co-op</i> Architected and developed an automated functional test suite composed of approximately 130 test cases for IBM Power Systems.	Austin, Texas
2008–2009	IBM <i>Power Systems Performance Co-op</i> Worked as a member of a team to benchmark systems, analyze performance data, develop workloads, perform maintenance on IBM Power Systems, and develop tools to aid in performance analysis.	Rochester, Minnesota

education

2010–2012	Masters of Science computer science Specialization: Object oriented architecture and design	University of Illinois, Urbana-Champaign
2005–2010	Bachelor of Science computer science Specialization: Software Engineering, Information Assurance	University of Illinois, Urbana-Champaign
