## professional summary

Principal Engineer and Software Architect with 15+ years of experience designing scalable systems and leading high-performing engineering teams. Proven track record of delivering enterprise-grade solutions across data pipelines, cloud infrastructure, and distributed systems. Expert in mentoring engineers, driving technical strategy, and translating business requirements into robust software architectures.

## industry experience

- |              |                                                                                                                                                                                                                                                                                                                                                          |                         |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| 2025-present | <b>ServiceNow</b><br><i>Senior Staff Software Engineer</i><br>ServiceNow acquired data.world July 2025.                                                                                                                                                                                                                                                  | Dripping Springs, Texas |
| 2022-2025    | <b>data.world</b><br><i>Principal Software Engineer</i><br>Principal Engineer focused on backend platform <ul style="list-style-type: none"><li>Architected and rolled out a pipeline capturing and delivering audit event records</li><li>Architected and built functionality to allow data.world to harvest customer metadata from the cloud</li></ul> | Dripping Springs, Texas |
| 2020-2022    | <b>DISCO</b><br><i>Senior Software Architect</i><br>Rolled out an enterprise communication fabric utilizing Apache Kafka and other transit technologies to reduce development time, increase velocity, and reduce costs across the DISCO platform.                                                                                                       | Dripping Springs, Texas |
| 2019-2020    | <b>DISCO</b><br><i>Software Architect</i><br>Software Architect responsible for the DISCO document ingest pipeline. Focused the majority of my time around architecting and developing a serverless pipeline for high-speed parallel document ingest including file typing, conversion, OCR, and translation.                                            | Dripping Springs, Texas |

2017-2019	<b>Civitas Learning</b> <i>Platform Lead, Senior Staff Software Engineer</i> <p>At Civitas, I was the tech lead for the data pipeline platform team. I was leading a team that was responsible for architecting and building out a next-generation streaming data pipeline in the higher education space to enable our consuming applications to be more real-time, scale efficiently, onboard new customers quicker, and reduce cloud computing costs. I was also responsible for on-boarding acquisitions to the existing and next generation Civitas ETL pipelines.</p> <p>In addition to understanding the technical challenges we face, I also strived to balance out our priorities based on the business value the team could deliver. This included mentoring other engineers, technical project planning and scoping, and working with product management to move the business forward.</p> <p>Technologies used included the Confluent platform, Apache NiFi, Apache Atlas, Apache Spark, Spring boot, and the AWS ecosystem among many others.</p>	Austin, Texas
2014-2017	<b>HomeAway</b> <i>Senior Software Engineer</i> <p>At HomeAway, I was a senior software engineer and team lead for the internal tools and infrastructure team. I was previously on the core platform team which covers HomeAway's high-traffic REST API and enterprise messaging busses. I worked with technologies such as RabbitMQ, Elasticsearch, Hadoop, Kafka, Rails, and Docker among many others.</p> <ul style="list-style-type: none"> <li>• Architected, developed, and rolled out a new internal application based on Ruby on Rails used by all engineers to accurately capture capitalizable time</li> <li>• Architected and developed a distributed microservice-based JSON registry used by a variety of applications across the organization</li> <li>• Led the migration to and architected new solutions on AWS for the productivity engineering organization</li> <li>• Mentored the 3 Day Startup Program sponsored by HomeAway both in Austin, TX and London, UK</li> <li>• Architected, developed, and open-sourced the HomeAway Ruby SDK for the HomeAway Developer API and Ruby library for communicating with Apache Storm clusters on behalf of HomeAway</li> </ul>	Austin, Texas
2012-2014	<b>IBM</b> <i>Staff Software Engineer</i> <p>Engineer on the Cluster Aware AIX team, the backbone of the clustering capabilities of the IBM enterprise grade UNIX operating system. I led the effort to maintain, refactor, and enhance the AIX cluster communications daemon.</p> <ul style="list-style-type: none"> <li>• Led the AIX effort to certify Oracle Real Application Clusters database on PowerHA</li> <li>• Enhanced AIX clustering to scale to 32 nodes and 1024 disks per node, including parallelization of core clustering libraries</li> <li>• Enabled unicast AIX cluster heartbeating</li> <li>• Enabled dynamic network configuration change support across clustered systems</li> <li>• Co-author of a clustering algorithm patent</li> </ul>	Austin, Texas

2010-2012	<b>University of Illinois at Urbana-Champaign</b> <i>Instructor - Department of Computer Science</i> Taught CS528 - Object Oriented Programming and Design. Graduate level course covering: <ul style="list-style-type: none"> <li>• Principles of object-oriented design</li> <li>• Design patterns (Gang of Four)</li> <li>• Use and design of frameworks</li> <li>• Reflection</li> <li>• Refactoring</li> <li>• Use of unit tests as specifications</li> </ul>	Urbana, Illinois
2010-2011	<b>IBM</b> <i>Power Systems Firmware Engineer Co-op</i> Architected and developed an automated functional test suite composed of approximately 130 test cases for IBM Power Systems.	Austin, Texas
2008-2009	<b>IBM</b> <i>Power Systems Performance Co-op</i> Worked as a member of a team to benchmark systems, analyze performance data, develop workloads, perform maintenance on IBM Power Systems, and develop tools to aid in performance analysis.	Rochester, Minnesota

## education

2010-2012	<b>Master of Science</b> computer science Specialization: Object oriented architecture and design	University of Illinois, Urbana-Champaign
2005-2010	<b>Bachelor of Science</b> computer science Specialization: Software Engineering, Information Assurance	University of Illinois, Urbana-Champaign

## publications

### patents

Enhanced Mechanisms for Granting Access to Shared Resources

E. Cruz-aguilar, P. Ganesh, M. Kandasamy, C. Meyer, and S. Tovcimak

US Patent 20150089059, 03-26-2015

URL: <http://appft1.uspto.gov/netacgi/nph-Parser?Sect1=PT01&Sect2=HITOFF&d=PG01&p=1&u=/netahtml/PT0/srchnum.html&r=1&f=G&l=50&s1=20150089059.PG NR.>

### thesis

CoMoTo: The Collaboration Modeling Toolkit

C Meyer

MS Thesis

University of Illinois at Urbana-Champaign, Aug. 2012

URL: <https://www.ideals.illinois.edu/handle/2142/34353>

## international peer-reviewed conferences/proceedings

Programming Studio: Advances and Lessons Learned

C. Meyer and M. Woodley

ITICSE, 2012, Haifa, Israel

URL: <http://dl.acm.org/citation.cfm?id=2325384>

---

## CoMoTo: The Collaboration Modeling Toolkit

C. Meyer, C. Heeren, J. Tedesco, and E. Shaffer

*ITICSE*, 2011, Darmstadt, Germany
